- Certified Consultants
- Improves ROI on rollouts
- Lowers deployment cost
- Sharing of best practices
- Develop deployment plan
- Increases productivity
- Reduces complexity
- Hands-on training

Each engagement is delivered by a fully qualified CSA consultant who provides guidance and analysis for planning and deployment:

> **SharePoint Deployment Planning Services**
 SharePoint Deployment Planning Services (SDPS) is designed to help your organization plan an effective deployment of Microsoft Office SharePoint Server.

Your consultant shares best practices, analyses your organizational environment, and provides tools and services to help you optimize the effectiveness of the Office SharePoint Service core capabilities, help lower the cost of deployment, and help improve the productivity of your organization. The number of engagement days is 1, 3, 5, 10, or 15, as determined by your Software Assurance coverage.

> Exchange Deployment Planning Services

Exchange Deployment Planning Services (EDPS) is designed to help guide your organization through the deployment planning stages of a Microsoft Exchange implementation. Through a structured engagement, your consultant reviews new Microsoft Exchange product features, shares best practices, analyses organizational requirements, provides hands-on deployment training, and helps create comprehensive deployment and implementation plans. The number of engagement days is 3, 5, 10, or 15, as determined by your Software Assurance coverage.

> Desktop Deployment Planning Services

Desktop Deployment Planning Services (DDPS) can help you ensure successful deployment of Microsoft Office or Windows software to increase usage, increase productivity, and lower costs. Your consultant collaborates with you to create a comprehensive deployment plan that includes analysis, business case, process, and technical procedures. The service is based on the Solution Accelerator for Business Desktop Deployment and best practices from Microsoft, and the objective is to help reduce the cost and complexity associated with high levels of process and automation. The number of engagement days is 1, 3, 5, 10, or 15, as determined by your Software Assurance coverage.
